ACADEMIC HISTORY

Nepal College of Information Technology

Bachelor in Software Engineering

- 2022 - present

National School of Sciences

+2 in Biology

- grade: B+
 - 2020-2022
-

SKILLS

- HTML, CSS, Javascript, React
 - C, Python, C++ , Fastapi
 - Figma
-

PROJECTS

PPE Detection System using YOLO v8

- YOLOv8, FastAPI, React
- Built a real-time PPE detection system using YOLOv8 to identify helmet and vest compliance from images and webcam feeds. Developed a FastAPI backend with authentication and logging, and a React frontend with live detection, alerts, and dashboard for monitoring violations.
- Project: <https://github.com/Haointheh/minor-project-1>

Anime Recommendation system

- Python, Streamlit, Colab
- Built a content-based recommendation system using similarity algorithms to suggest anime based on user preferences. Developed an interactive Streamlit interface with filtering and ranking features for personalized recommendations.
- <https://github.com/Haointheh/anime-recommendation-system>

PoppinVans Cafe Website

- HTML, CSS, PHP, MySQL
- Built a full-stack dessert café website with PHP and MySQL, featuring user authentication, menu browsing, and online order management with a responsive frontend.
